## ENGINEER

---

### Electronic

### Software

### Design

3 main areas where I have knowledge and experience, I have experience in hardware and software projects and design

I learned to program since I was 8 years old and since then I have diversified my knowledge in all possible areas, I love challenges, I look for challenges every day and in search of those challenges and I had the experience of working with companies that create software for business administration. (example: ERP, CRM, POS) I learned architectural design since I was very young, I started with Autocad, then RhinoCeros, 3D studio Max, SolidWorks, this led me to work with companies that design airplanes, complete products, design of molds and handling of CNC machines and creacion esenarios for movies. Look for new remains this led me to learn electronics (PCB, Arduino, Motors, Switch, lights, sensors, etc) and hardware development, I can now create from software tools and simple Hardware or complete products for your production and machinery for industries

Languages: NET, C# , PHP, MySQL, MS Access, Btrieve, HTML, JavaScript, XML, CSS, AutoList (AutoCad), CNC-STL,GCODE, Android, Arduino, PCB, PLC,

### **(development of custom electronic hardware)**

### Software experience:

---

- Windows Server 2008
- Windows Register Expert
- Apache Server
- CNC-STL
- GCODE
- Ms-DOS
- Manufacture CNC Machine
- 3D Studio Max
- Adobe Photo Shop
- Adobe Illustrator
- Corel Draw
- Adobe Premier
- SolidWorks
- RhinoCeros
- AutoCad
- Arduino
- MS Access
- MS Publisher
- MS-Office
- Google Analytics
- Google Adwords
